assessment

Inspera Products February 2022

ABOUT

Inspira supports your organisation's entire examination cycle; everything from planning, designing, delivering exams either remotely or onsite, giving feedback and marking assessments.

Founded in 1999 and based in Oslo, we are a dedicated team of more than 130 EdTech entrepreneurs striving to revolutionise education on global scale.

INSPERA IN NUMBERS:

142+

Countries with end-users

73M+

Sheets of paper saved in 2021

140+

EdTech enthusiasts working together

TRUSTED BY WORLD-CLASS EDUCATION INSTITUTIONS:

OUR SOLUTIONS

We offer an end-to-end assessment platform with additional solutions that cover all your assessment needs entirely on-screen.

The platform consists of three main products:

Inspera Assessment

A cloud-based platform for running high-stakes exams.

Our core product.

Inspera Exam Portal

Add an extra layer of security and flexibility.

Requires Inspera Assessment.

Inspera Smarter Proctoring

Advanced remote proctoring on a high scale.

Requires Inspera Assessment and Inspera Exam Portal.

A PLATFORM TO SUIT YOUR NEEDS

Onsite, Bring-Your-Own-Device, remote or online proctored. Assessment needs change over time and vary from institution to institution. We offer three configurations of our platform, so you can choose the option that best caters to your situation and needs.

Inspera Assessment

Have the benefits of an all-in-one tool for managing and coordinating examinations, reduce your costs, and ensure the integrity of your exams.

Best for: onsite high-scale formative and low-stakes summative assessment.

Inspera Exam Portal

Access an even wider range of security, reporting and communication features. The fully integrated Inspera Lockdown Browser is configurable and includes strong remote capabilities.

Best for: onsite or remote low-scale high-stakes summative assessment.

Inspera Smarter Proctoring

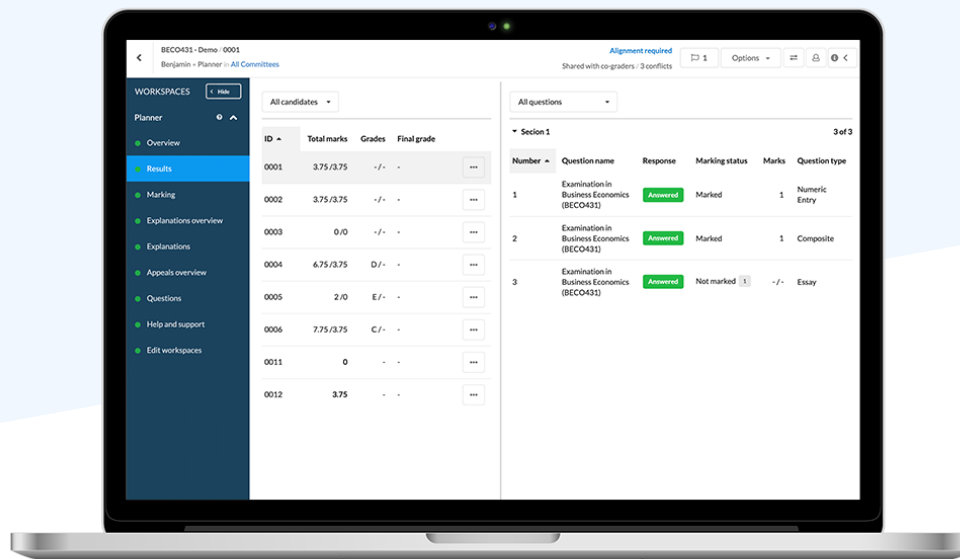

Use secure, online proctoring on a high scale via advanced monitoring of test-takers. Adjust the remote proctoring capabilities to balance privacy concerns and exam integrity.

Best for: remote high-scale high-stakes summative assessment.

We have the necessary expertise to ensure a successful rollout. Please ask for our additional consultancy and implementation services. We will help you all the way.

PRODUCT OVERVIEW

Inspera Assessment

Inspera Assessment is an end-to-end cloud-based platform for running exams and tests 100% online, remotely and onsite. The platform digitalises your organisation's examination cycle and allows you to plan, design, deliver, grade, share, and thereby improve your assessment practices, all from your screen. Inspera Assessment supports both open and closed book exams, as well as Bring-Your-Own-Device (BYOD) and computer test centre environments.

The platform creates a level playing field, where all test-takers have the chance to objectively and authentically prove their skills. A standard lock-down browser is included in the solution, to minimise the risk of plagiarism and ensure assessment integrity.

Who is it for?

Institutions who want a seamless, digital assessment experience for their students and strive to have everything formative and summative in one place.

Key benefits:

Achieve higher staff and student satisfaction by providing an efficient and fulfilling assessment experience, reduce costs and ensure the integrity of your exams.

Why choose Inspera Assessment?

Plan, design, deliver, mark & annotate, share, and improve exams 100% on-screen.

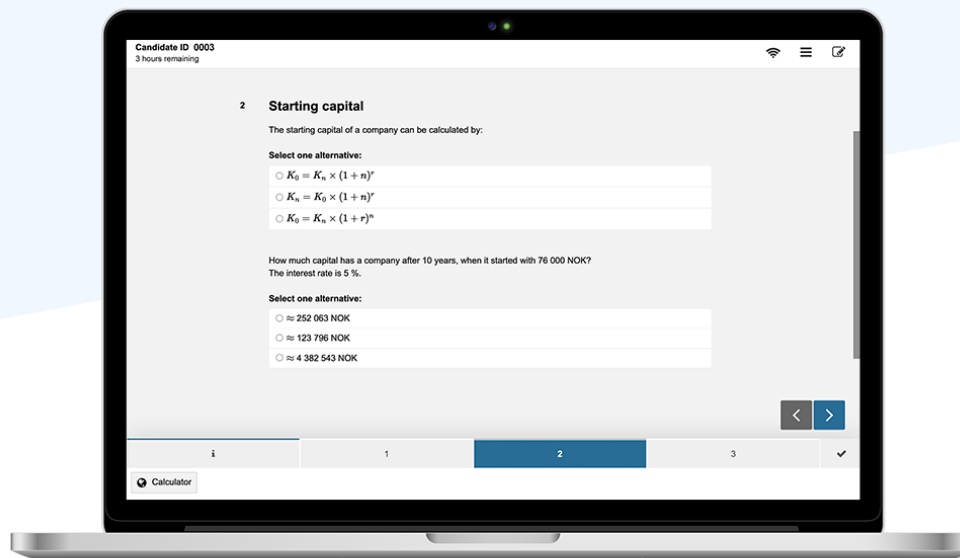

What's included?

- Enterprise grade item banking with question and question set authoring and reuse of existing content.
- Resilient, scalable and universally accessible test delivery & taking, supporting whitelisted resources and lock-down browser on PC, Mac, iPad and Chromebook.
- Central and local monitoring of the behaviour of test takers during the test session to prevent cheating.
- Efficient marking of open question types, with precise annotations and criteria based marks, tailored by workflow configuration allowing for double-blinded marking and more.
- Releasing results with feedback and annotation to test takers on a scheduled date.
- Exporting of data in relation to submissions, marks and logs.
- Standard lock-down browser for PC & Mac, including OS-level kiosk mode and not requiring test-taker Admin rights during the exam.
- Allow test-takers to make hand-written submissions that are captured by scanning with Inspera Scan (additional fee).
- All data and servers hosted in Europe.
- Standard Inspera SLA to guarantee your business continuity.
- Standard Inspera Training & Support.
- Easy identity management with our integrations and open APIs: Single Sign On (SSO), SAML 2.0 or OAuth OpenID.
- Site branding (institution logo and background image on login page).
- Accessibility support compliant with leading industry standards.

PRODUCT OVERVIEW

Inspera Exam Portal

Inspera Exam Portal (formerly known as Inspera SEB) addresses the need for elevated exam security, test-taker convenience and assistance, and administrative flexibility for onsite BYOD exams as well as at-home exams. The fully integrated Inspera Lockdown Browser is configurable to be able to balance privacy and security. It includes strong remote capabilities, more robust handling of connectivity issues during the exam delivery, and allows audio recording. This module is for institutions who want access to a wider range of security, reporting and communication features than what a standard lockdown browser can offer.

Who is it for?

Institutions who conduct online exams remotely or on-site BYOD exams, and want an extra layer of security and flexibility.

Key benefits:

With the fully integrated Inspera Lockdown Browser, you can balance privacy and security, and make use of the strong remote capabilities.

Why choose Inspera Exam Portal?

Improve the user experience of exam day and add an extra layer of security, remotely or onsite.

What's included?

- Inspera's advanced lock-down browser for PC & Mac.
- Configurable blacklisted programs, to further customise access permissions to third-party resources during the exam.
- Remote ID-verification (AI-supported facial recognition or manual).
- Diagnostic equipment check, to reassure test-takers they are ready for the exam.
- Two-way live chat between test-takers and support staff during the exam (scheduled to be released in spring 2021).
- Continuous monitoring of exam delivery despite the temporary loss of internet connectivity.
- Real-time logs of local desktop applications for live support and security reporting during the exam.
- One-click configuration to add remote proctoring.
- Certificate-based signing of applications and communications to ensure the software has not been tampered with.

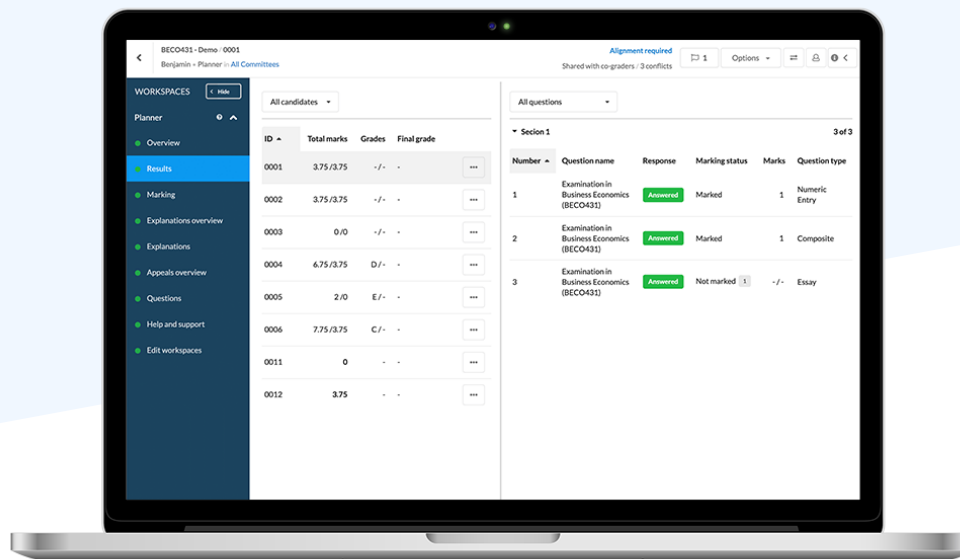

Please note:
Inspera Exam Portal requires Inspera Assessment.

PRODUCT OVERVIEW

Inspera Smarter Proctoring

Inspera Smarter Proctoring is a remote proctoring solution building on the Inspera Exam Portal and including its functionalities. Furthermore, Inspera Smarter Proctoring includes advanced monitoring of test-takers via webcam and screen sharing technology - either fully automated, human proctored, or combined.

Inspera Smarter Proctoring works as an add-on and is for institutions who require online proctoring on a high level. You can adjust the remote proctoring capabilities, thereby balancing privacy concerns and exam integrity. The fully automated AI solution can be switched on and off, and live remote proctoring can be added via an integration. The monitoring works despite a temporary loss of internet connectivity.

Who is it for?

Institutions who require higher level proctoring alongside their remote or onsite examinations, due to the nature of the certain professional qualifications.

Key benefits:

Use secure, online proctoring on a high scale via advanced monitoring of test-takers.

Why choose Inspera Smarter Proctoring

Enhance exam security with remote proctoring, either with Record-Alert-Review or Live.

What's included?

- Monitor test-takers live with advanced analytics, get notified of any suspicious behaviour and intervene as required.
- Review end-to-end video recording of each test-taker's webcam (video & audio) and screen, or navigate directly to flagged suspicious activities.
- One-click configuration to add live remote proctoring (scheduled to be released in spring 2021).
- Modular approach to allow flexible exam settings on test-level, e.g. switching on/off AI features or screen recording when needed.

Please note:
Inspera Smarter Proctoring requires Inspera Assessment & Inspera Exam Portal
