

Finishing your bachelors (transferring credits to masters)

You may wish to transfer some of the course credits you gained during your bachelors to your masters, and therefore need approval and signature of the Master coordinator. Please note below the number of credit points needed to take during your masters. Also note that signature of permission to transfer credits does not mean they can be used towards the 20 elective masters CPs: this can only be defined on the learning agreement (see below). Hence, it makes sense to decide which credit points to transfer AND to make the learning agreement at the same time. Consequently, the Master coordinator will only authorize transfer of credits in the presence of a complete learning agreement.
